H.R. 4144: The Strengthening Economic Development Through Affordable Housing Act

H.R. 4144 opens up a new funding source of vital start-up dollars to be used for the acquisition, construction, renovation, and maintenance of affordable housing projects. By granting Community Development Corporations (CDCs) and non-profit organizations access to \$1.5 billion in funding for affordable housing projects, H.R. 4144 should help partially mitigate the damage done by our state's elimination of redevelopment agencies. H.R. 4144 would help cities fund affordable housing projects without having to borrow from city funds.

By contacting your local Representative, and urging your Member to cosponsor H.R. 4144, you can help increase the funding available to CDCs and non-profit organizations throughout the state. Spreading awareness of this bill is essential for increasing the number of advocates who can then pressure their representatives to support it.
